Pace and tendency

Both teams combined: **142.4 plays per game** (league average 129.3)

Team	Plays / G	Seconds / play (neutral)	Pass rate over expected
ARI Arizona Cardinals	**69.0** #5	**30.0** #14	**−0.1%** #16
LA Los Angeles Rams	**73.4** #2	**30.7** #21	**+6.8%** #3

Neutral = one-score games, first three quarters. Pass rate over expected is early downs, from nflverse's play-by-play model. Rank 1 = most plays, fastest pace, most pass-heavy.

Longer bar, better rank. Ranks are out of 32. The edge goes to whichever side ranks at least 6 spots better; Rush Yds / Att is yards per rush attempt, gained by the offense and allowed by the defense; INT compares interceptions thrown by the offense with interceptions made by the defense. EPA / play (expected points added) and Success % use every pass and run play from nflverse play-by-play; for a defense, lower is better. Red zone TD % is the share of drives that ran a play inside the 20 and ended in a touchdown. Explosive % counts passes of 20+ yards and runs of 10+ per play; Pass 20+ % and Rush 10+ % split it by play type. Sack and pressure rates are per dropback (pressures are Pro Football Reference's count); for an offense lower is better, for a defense higher.

ARI Arizona Cardinals 1-4
