Pace and tendency

Both teams combined: **138.8 plays per game** (league average 129.3)

Team	Plays / G	Seconds / play (neutral)	Pass rate over expected
CHI Chicago Bears	**75.4** #1	**28.7** #5	**–2.6%** #23
ATL Atlanta Falcons	**63.4** #19	**32.9** #31	**–10.3%** #30

Neutral = one-score games, first three quarters. Pass rate over expected is early downs, from nflverse's play-by-play model. Rank 1 = most plays, fastest pace, most pass-heavy.

Longer bar, better rank. Ranks are out of 32. The edge goes to whichever side ranks at least 6 spots better; Rush Yds / Att is yards per rush attempt, gained by the offense and allowed by the defense; INT compares interceptions thrown by the offense with interceptions made by the defense. EPA / play (expected points added) and Success % use every pass and run play from nflverse play-by-play; for a defense, lower is better. Red zone TD % is the share of drives that ran a play inside the 20 and ended in a touchdown. Explosive % counts passes of 20+ yards and runs of 10+ per play; Pass 20+ % and Rush 10+ % split it by play type. Sack and pressure rates are per dropback (pressures are Pro Football Reference's count); for an offense lower is better, for a defense higher.

CHI Chicago Bears 3-2
