Pace and tendency

Both teams combined: **127.0 plays per game** (league average 129.3)

Team	Plays / G	Seconds / play (neutral)	Pass rate over expected
DAL Dallas Cowboys	**65.0** #13	**27.8** #2	**+3.9%** #6
GB Green Bay Packers	**62.0** #23	**30.4** #18	**−0.5%** #19

Neutral = one-score games, first three quarters. Pass rate over expected is early downs, from nflverse's play-by-play model. Rank 1 = most plays, fastest pace, most pass-heavy.

Longer bar, better rank. Ranks are out of 32. The edge goes to whichever side ranks at least 6 spots better; Rush Yds / Att is yards per rush attempt, gained by the offense and allowed by the defense; INT compares interceptions thrown by the offense with interceptions made by the defense. EPA / play (expected points added) and Success % use every pass and run play from nflverse play-by-play; for a defense, lower is better. Red zone TD % is the share of drives that ran a play inside the 20 and ended in a touchdown. Explosive % counts passes of 20+ yards and runs of 10+ per play; Pass 20+ % and Rush 10+ % split it by play type. Sack and pressure rates are per dropback (pressures are Pro Football Reference's count); for an offense lower is better, for a defense higher.

DAL Dallas Cowboys 2-3
