NFL Week 8 Matchup Report

Who is set up for a good game, and who is not, in all 1 games of Week 8, from Monday, Nov 2 through Monday, Nov 2. After the game pages come two rankings across the whole slate: the best overall matchups and the players most likely to score a touchdown.

HOW TO READ THIS

Method. Each player's per-game production is compared with how the opposing defense ranks against his position (backs, receivers, tight ends) and against the pass. Ranks are out of 32; #1 is the stingiest defense.

Source. Every number comes from the NFL dashboard (rhyman7.github.io/nfl), with stats through Week 7 and lines as of Nov 2. The report is built automatically after each data update.

Lines. Every game has a spread and total in the data.

Injuries. Source: ESPN injury report, as of Nov 2, 4:43 PM ET. Players listed out, doubtful, on IR or suspended are left out of the picks and named in the game read; questionable players stay in, tagged Q. Players who missed their team's last game are also left out. Schedule strength is not adjusted for.

Each dot is one spot on that week's list, left to right from #1 to #10; green means he scored a rushing or receiving touchdown. "Expected" adds up the board's chances. Prices are each book's anytime-TD odds before kickoff; the better one is bold. Weeks 3–6 are rebuilt from the board's projections (the chances weren't saved then).
